

MEYLE-PD brake pads for vans with wear-optimised friction material mix!

To fit Mercedes Sprinter | VW Crafter | Citroën Jumper | Opel Movano | Renault Master | Ford Transit | Iveco Daily.

Brake pads used on vans are subject to heavy load and stress levels during operation often resulting in early part wear and reduced braking performance. This is why the new generation of MEYLE-PD brake pads for vans features a highly wear-resistant friction material mix designed to offer extended brake pad life.

In the best of cases, vans equipped with the new rugged MEYLE-PD brake pad will only come to the workshop for routine vehicle inspection rather than unscheduled brake replacement – saving you precious time and money!

The complete range of MEYLE-PD brake pads for vans includes more than 300 part numbers.

MEYLE-PD brake pads for vans – all product features at a glance:

- Wear-optimised friction material mix
- Superior friction coefficient for maximum braking performance
- Most pads feature three-layer damping shims for efficient acoustic quieting
- Additional adhesive with advanced damping properties for maximum noise reduction
- Comprehensive test series completed successfully
- No copper and heavy-metal compounds
- Tested and certified according to ECE R 90

No copper and heavy-metal compounds!
