The vehicle manufacturers named above intend to complete a product replacement when the tensioner pulley is replaced. The existing tensioner pulley with part number 531 0166 20 will be replaced by the tensioner pulley with part number 531 0819 10 (see Image 1).

As part of this conversion, models up to engine number 328704 must be fitted with a new engine mount (see Image 2, Item 8). For this reason, Schaeffler Automotive Aftermarket provides the tensioner pulley

kit 530 0492 10 and tensioner pulley set 530 0492 09 for the conversion process. Both products include a new engine mount.

From engine number 328705, the engine mount (OE No. 684051) is already fitted. Tensioner pulley kit 530 0494 10 and tensioner pulley set 530 0494 09 are offered without engine mount for vehicles manufactured from this point.
