IMPORTANT NOTE!

Note the specifications of the vehicle manufacturer!

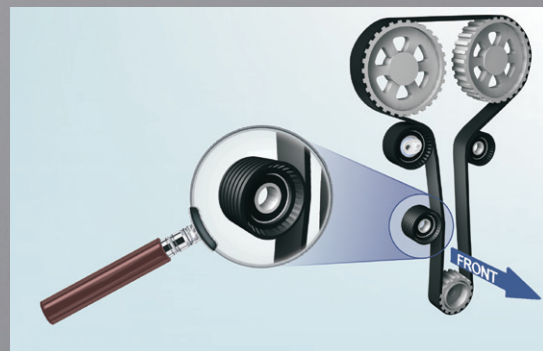

Figure 1: Belt path and pulley positions in the F4R engine

A tensioner pulley and two deflection pulleys are installed in the Renault engines listed. The deflection pulley highlighted in figure 1 features a grooved race to prevent unwanted whistling noises from the timing belt.

To ensure this functionality, do not swap the two deflection pulleys!

The correct positions of the individual components are displayed in figure 1. Deflection pulley 55587 with the grooved race is always found on the side of the tensioner pulley in the engines specified.

Figure 2: Contents of kit 555571

Figure 2 shows the content of tensioner pulley kit 555571 which contains all of the parts required to change a timing belt:
