IMPORTANT NOTE!

Please check correct function of each auxiliary drive component and replace it if necessary.

Please refer to our catalogues for detailed, up-to-date vehicle information.

Note the specifications of the vehicle manufacturer!

The vehicle manufacturers named above intend to complete a product replacement when the tensioner pulley is replaced.

The existing tensioner pulley with part number 55316 will be replaced by the tensioner pulley with part number 55383 (see Image 1).

As part of this conversion, models up to engine number 328704 must be fitted with a new engine mount (see Image 2, Item 8).

For this reason, RUVILLE provides the tensioner pulley kit 5538370 and tensioner pulley set 5538350 for the conversion process. Both products include a new engine mount.

From engine number 328705, the engine mount (OE No. 684051) is already fitted. Tensioner pulley kit 5538371 and tensioner pulley set 5538351 are offered without engine mount for vehicles manufactured from this point.

Key to Image 2: *) not available separately.

- (1) Tensioner pulley 55383
- (2) Deflection pulley 55368
- (3) Timing belt 555314*
- (4) Bolt M10x45 mm*
