

# REPLACE THE WATER PUMP 65906 WITHOUT CASING IN THE 66601 WITH AN ALUMINIUM CASING

TECHNICAL INFO NO. 1121

## VEHICLE MANUFACTURER / MODELS:

|                |               |
|----------------|---------------|
| <b>Peugeot</b> | 406, 206      |
| <b>Citroen</b> | Xsara, Jumpy  |
| <b>Fiat</b>    | Scudo, Ulysse |

## APPLIES TO ENGINES:

EW10J4, EW7J4, EW10D

## APPLIES TO PART NO.:

| RUVILLE-No. | OE-No.  |
|-------------|---------|
| 65906       | 1201.G4 |
| 66601       | 1201.K1 |
|             | 1201.L1 |

## IMPORTANT NOTE!

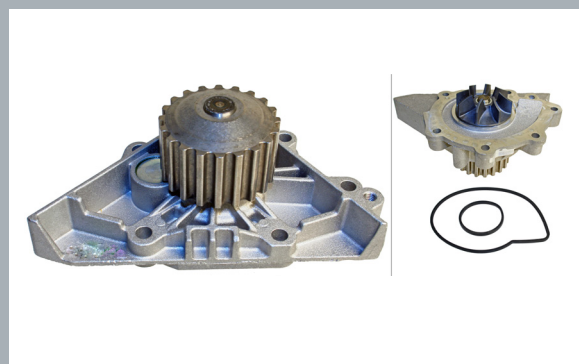

- Sealing surfaces in the motor need to be cleaned before the new water pump is fitted
- The coolant needs to be completely replaced and the cooling circuit needs to be rinsed

Observe all information provided by the manufacturer!

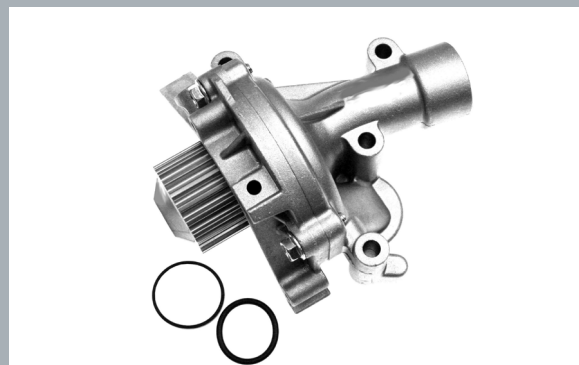

The OE has changed the casing of the water pump from a plastic casing to one made of aluminium.

As a result of this change, RUVILLE now only supplies the water pump with a casing. This prevents the pump insert 65906, which is made of aluminium, being fitted with the plastic casing that may be in the vehicle. This also avoids any sealing problems arising from the different materials.

For this reason, RUVILLE will replace the pump insert 65906 in the water pump with the casing 66601.
