

## SERVICE INFO No. 1153

# Water pump Audi / VAG 65485GS

Manufacturer:	VW, Audi, Skoda
Models:	
Audi:	A4, A5, A6
VW:	Golf VII
Skoda:	Skoda Octavia, Seat Leon
Engines:	EA888, Generation 2
Item number:	65485GS
OE number:	06L 121 111 G thermal management module + 06L121005A water pump

Image 1: 65485GS

Following the trend for innovative water pump solutions, Ruville has now added the thermal management module to its program.

The TMM 65485GS regulates all cooling circuits in the car fully automatically, thereby ensuring the right ambient temperature for the sensitive parts. As a result, the passenger space inside the vehicle is brought to the required temperature very quickly in contrast to conventional systems. The TMM is supplied with the screw that needs to be replaced and the drive belt.

### IMPORTANT NOTE!

Do not reuse the screw from the balance shaft. Always observe the tightening torque of the attachment screws!  
The screw on the balance shaft has a left-hand thread!

Due to the fact that the water pump is fitted in the timing drive, we recommend replacing the water pump and coolant when replacing the timing belt.

Please refer to the usual media, e.g. TECDOC, online catalogue etc., for the precise vehicle assignment.

### INFORMATION

Corresponding spare parts can be found in our online catalogue at [www.ruville.de](http://www.ruville.de). Where reference is made to the spare parts numbers of the vehicle manufacturers, this is only for the purposes of comparison.

Please observe the vehicle manufacturer specifications!
